DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 14, drawn to phytases, classified in class 435, subclass 195.
- II. Claims 7-13, drawn to DNA, vectors, a host cell encoding and expression of phytases, classified in class 536, subclass 23.2.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II, each comprise a chemically unrelated structure capable of separate manufacture, use, and effect. The DNA in Group II comprises a nucleic acid sequence whereas the proteins of Group I each comprise an amino acid sequence. The DNA has other uses besides encoding the proteins of Group I such as a hybridization probe or in gene therapy. Further, the proteins of Group I can be prepared by processes which are materially different from recombinant DNA expression of Group II, such as by chemical synthesis, or by isolation and purification from natural sources.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1652

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
